SI RARE AND I NEW FOR THE LITHUANIAN FAUNA LEPIDOPTERA SPECIES

Ivinskis P., Maceika A., Stravinskas V., Švitra O., Štitilis D.

The paper presents the data on SI rare and I new Lepidoptera species found in Lithuania. The investigations were carried out in 14 administrative districts of Lithuania: Alytus (Nat. R., Žuvintas, Margelai), Anykščiai (v. Skiemony), Ignalina (t. Vismaginas), Jonava (v. Rizgonys, env. of L. Aklasis), Kaišiadorys (v. Kalviai, v. Sevelionys), Kretinga (v. Monciškės), Marijampolė (v. Juodeliai, v. Višakio Rūda), Molėtai (v. Alnė, v. Budriškės), Širvintos (v. Allionys), Švenčionys (v. Galednė, v. Kirdeikiškiai, 5 km N from v. Labanoras), Ūkmerge (v. Jonuškai, v. Kertuša, v. Lokinė, v. Nuotekai, v. Pabaiskas, v. Pažilė, v. Pilionys, v. Zujai, f. Dukstyna, f. Savaikiai, f. Villukai), Varėna (v. Merkinė), Vilkaviškis (v. Ančlaukis), Vilnius (env. of L. Gėla at tsh. Nemencinė) as well as in the towns of Kaunas, Palanga (sub. Šventoji), Ukmerge and Vilnius city (suba. Kairėnai, Naujieji Verkiai). The material has been collected by the authors P. Ivinskis (Iv.), A. Maceika (M.), A. Stravinskas (Str.), G. Švitra (Šv.), D. Štitilis (Št.) and the collectors D. Dapkus (D.), J. Matlevskis (Met.) and E. Titov.

For each species information on its locality, finding date,

number of collected specimens and collector is provived.

Check-list of species

I. Cossidae

1. *Phragmatocacia castaneana* Hb.

Al, Žuvintas, 9-10.VII.1991, 5 spec. (Šv.).

2. *Zeuzera pyrina* L.

Ukmerge, 14.VI.1988, 1 spec. (D.); Kš, Sevelionys, 14.VII. 1991, 1 spec. (Str.).

III. Limacodidae

3. *Heterogena ascella* Den. et Schiff.

Al, Margelisai, 7.VII.1991, 1 spec. (Šv.); V. Gėla, 2.VII. 1991, 1 spec. (M.), Mrj, Juodeliai, 12.VII.1992, 3 spec. (Šv.).

III. Sesiidae

4. *Synanthedon flaviventris* Stgr.

Vilnius, Kairėnai, 12, 19.VII.1991, 7 ♂ with pheromone traps (Met.).

5. *S. mésiaeformis* H.-S.

Vilnius, Kairėnai, 25.VI. 3, 8.VII.1991, 4 ♂ with pheromone traps (Met.).

6. *Bembecia triannuliformis* Frr.

Švnč, Kiedeikiškiai, 13.VII.1991, 1 spec. (Šv.).

IV. Hesperiidae

7. *Erynnis tages* L.

Mlt, Alnė, 6.VI.1992, 2 spec. (Šv.).

8. *Pyrgus serratulae* Rbr.

Jn, Rizgony, 10, 18.VI.1991, 2 spec. (Šv.).

9. *Carcharodus flocciferus* Z.

Kš, Sevelionys, 29.VI.1990, 1 spec. (Str.); Ukm, Lokinė, 29.VI.1991, 1 spec.; Mrj, Višakio RDa, 22.VI.1992, 1 spec. (Šv.).

V. Papilionidae

10. *Papilio machaon* L.

Kš, Kalviai, 27, 30.VII.1991, 3 spec. (Str.).

VI. Pieridae

11. *Pontia daplidice* L.

Kš, Sevelionys, 22.VI.1990, 1 spec. (Str.).

12. *Colias croesus* Fourc.

Kš, Sevelionys, 5-15.VIII.1991, 10 spec. (Str.).

VII. Attacidae

13. *Aglia tau* L.

Ukm, Januškai, 4.V.1991, 1 spec., Kertuša, 26.V.1991, 4 spec. (D.).

VIII. Thyatiridae

14. *Polyploca ridens* P.

An, Skiemony, 13:IV.1991, 1 spec. (Šv.).

IX. Geometridae

15. *Archisaris notha* Hb.

Ukm, Saveikiai, 13.IV.1991, some spec., Viliukai, 7.IV. 1991, about 20 spec. (Šv.), c.

16. *Hemistola immaculata* Thnbg.

V. Gėla, 2.VII.1991, 1 spec. (M.).

17. *Scopula corrivalaria* Kr.

Al, Margelisai, 7.VII.1991, 2 spec., Žuvintas, 9.VII.1991, about 10 spec.; Švnč, Kiedeikiškiai, 14.VII.1991, 1 spec. (Šv.).

18. *S. decorata* Den. et Schiff.

V. Gėla, 22.VIII.1991, 1 spec. (M.).

19. *Trichopteryx polycommata* Denç et Schiff.
Kė, Sevelionys, 13.V.1990, I spec., 24.VI.1991, I spec.
(Str.).
20. *Iampropteryx otregiata* Metc.
Ukm, Dukstyna, 10.VI.1991, I spec., 30.VII.1991, I spec.,
7-29.VIII.1991, 6 spec. (D.), Pilionys, 1.VIII.1991, I spec. (D.).
- An, Skiemonya, 17.VIII.1991, I spec. (Šv.).
21. *Catarhoe rubidata* Den. et Schiff.
Palanga, Šventoji, 23.VII.1991, 2 spec.; Krtn, Monciškės,
1.VIII.1991, 3 spec. (Šv.).
22. *Triphosa dubitata* L.
Krtn, Monciškės, 1.VIII.1991, I spec. (Šv.).
23. *Ecliptoptera capitata* H.-S.
Ukm, Dukstyna, 16.VI.1991, I spec.; Švnč, Gelednė,
24.VI.1991, I spec. (Šv.).
24. *Horisme nemulata* Hb.
Švnč, Gelednė, 24.VI.1991, I spec. (Šv.).
25. *Pareulype berberata* Den. et Schiff.
Kė, Sevelionys, 13.V.1990, I spec., 24.VI.1991, I spec.
(Str.).
26. *Spargania luctuata* Den. et Schiff.
Švnč, Gelednė, 24.VI.1991, I spec., 5 km W from Labanoras,
24.VI.1991, 5 spec. (Šv.).
27. *Epirrhoe galiata* Den. et Schiff.
Palanga, Šventoji, 29.VII.1991, I spec.; Krtn, Monciškės,
1.VIII.1991, I spec. (Šv.).
28. *Perizoma bifaciatum* Hw.
Palanga, Šventoji, 31.VII.1991, 2 spec.; Krtn, Monciškės,
1.VIII.1991, I spec.; Ukm, Dukstyna, 7.VIII.1991, 3 spec. (Šv.).

29. *P. blandiata* Den. et Schiff.
Kė, Sevelionys, 9.VII.1991, I spec. (Str.).
30. *P. didymata* L.
Kė, Sevelionys, 27.VI.1990, I spec., 9-21.VII.1991, 7 spec.
(Str.).
31. *P. lugdunarium* H.-S.
Ukmergė, 18.VII.1992, I spec.; Ukm, Sujai, 21.VII.1992, 2
spec. (Šv.).
32. *P. sagittatum* F.
Ukm, Pašilė, 7.VII.1991, I spec. (D.); Kė, Sevelionys,
5.VII.1991, I spec. (Str.).
33. *Eupithecia abbreviata* Stph.
Ign, Visaginas, 19.VIII.1991, 1 ♂ (Titov); Mrj, Juodeliai,
22.VI.1992, I spec. (Šv.).
34. *E. denotata* Hb.
Palanga, Šventoji, 31.VII.1991, I spec. (Šv.).
35. *E. dodoneata* Gn.
V, Gėla, 19.V.1991, I spec. (M.).

81 reta ir I nauja Lietuvos faunai drugių rūsys

Ivinskis P., Maceika A., Stravinskas V., Švitra G., Štitilis D.

Reziume

Pateikiami duomenys apie 81 retą ir I naujį Lietuvos faunai drugių rūšis, priklausančias I3 žipimui.

Kiekvienai rūšiai nurodoma radimo vieta, data, egzempliorių skaičius ir rinkikas.

81 редкий и 1 новый для фауны Литвы видов чешуекрылых

Ивинис П., Мацейка А., Стравинскас В., Швитра Г., Штилис Д.

Резюме

Приходятся данные о 81 редком и 1 новом для фауны Литвы видах чешуекрылых, принадлежащих к 13 семействам.

Для каждого вида указаны место сбора и дата находки, количество собранных экземпляров, сборщиков.

New and rare for Lithuania insect species. Records and descriptions of 1993

23 NEW FOR LITHUANIA ICHNEUMONID SPECIES (HYMENOPTERA, ICHNEUMONIDAE), FOUND IN 1974, 1986 AND 1992

Jonaitis V.

The material was collected by the author and A. Jakimavičius (further - Jak.), S. Pakalniškis (P.) in 4 administrative districts of Lithuania: Jurbarkas (Nat. R. Viešvilė), Prienai (fms. Biržtonas), Tauragė (Nat. R. Viešvilė, V. Bičiai), Vilkaviškis (V. Gižai) and in Vilnius city (sub. Jerusalė, sub. Pilaitė).

All 23 species of Lithuanian Ichneumonidae belong to 21 genera.

For each species information on its locality (district and exact finding place following a comma), finding date, the number of collected specimens, collector and biotops provided.

The material is preserved in the collection of Institute of Ecology.

Check-list of species

1. *Acrodactyla carinator* Aubert

Jrb, Viešvilė, 12.VI.1992, 1 ♀, mixed forest on swampy bank of the Viešvilė.

2. *Netelia caucasica* Kok.

Trg. Viešvilė, 26.VI.1986, 1 ♀ (P.), thinned patch in the pine forest.

3. *Polyblastus tuberculatus* Teun.

Vlkv, Gižai, II.VI.1992, I ♀, deciduous woods on farm-
land.

4. *Eridolius consobrinus* Holmgr.

Vlkv, Gižai, II.VI.1992, I ♂, deciduous woods on farm-
land.

5. *Ischnoceros caligatus* Grav.

Vilnius, Jeruzalė, Jeruzalė, 8.VIII.1974, I ♀ (Jak.),
garden with deciduous trees and near the forest.

6. *Galis limbatus* Grav.

Trg, Viešvilė, Eičiai, II.VI.1992, I ♂, mixed pine fo-
rest.

7. *Endasys transversoareolatus* Strobl

Trg, Viešvilė, Eičiai, II.VI.1992, I ♂, mixed pine fo-
rest.

8. *Iphygadeuon exiguum* Grav.

Trg, Viešvilė, Eičiai, II.VI.1992, 2 ♀, mixed pine fo-
rest.

9. *Mesoleptus transversator* Thunb.

Prn, Biržtonas, 10.VI.1992, I ♂, meadow on the edge of
mixed forest on banks of the Nemunas.

10. *Atractodes arator* Hal.

Jrb., Viešvilė, 25.VI.1986, I ♀ (P.), edge of the al-
der grove.

II. *Atractodes pauxillus* Först.

Trg, Viešvilė, Eičiai, II.VI.1992, I ♀, mixed pine fo-
rest.

12. *Cubocephalus lacteator* Grav.

Jrb, Viešvilė, 25.VI.1986, I ♀ (P.), edge of the alder

grove; I2.VI.1992, 2 ♂, mixed forest on swampy bank of the
Viešvilė.

13. *Sympertia montanus* Grav.

Trg, Viešvilė, 26.VI.1986, I ♀(P.), thawed patch in
the pine forest.

14. *Mesoleptidea semirufus* Holmgr.

Jrb, Viešvilė, I2.VI.1992, I ♀, mixed forest on swam-
py bank of the Viešvilė.

15. *Barycnemis confusa* Horstm.

Trg, Viešvilė, I2.VI.1992, I ♀, felled area of the pine
forest.

16. *Barycnemis gracillima* Thoms.

Trg, Viešvilė, I2.VI.1992, I ♀, felled area of the pi-
ne forest.

17. *Probles truncorum* Holmgr.

Jrb, Viešvilė, 25.VI.1986, 2 ♀.(P.), moist birch forest.

18. *Camposcopus canaliculatus* Ratz.

Jrb, Viešvilė, 27.VI.1986, I ♀ (P.), bank of the Vieš-
vilė.

19. *Chorinaeus brevicalcar* Thoms.

Vlkv, Gižai, II.VI.1992, I ♀, deciduous woods on farm-
land.

20. *Coleocentrus excitator* Poda

Trg, Viešvilė, 26.VI.1986, I ♀ (P.), thawed patch in
the pine forest; Jrb, Viešvilė, I2.VI.1992, I ♀, mixed fo-
rest on swampy bank of the Viešvilė; Vilnius, Pilaitė,
2.VII.1992, I ♀, edge of the pine forest.

21. *Diaschisaspis campoplegooides* Holmgr.

Trg, Viešvilė, Eičiai, II.VI.1992, 3 ♂, mixed pine forest.

22. *Notosmus bohemani* Wesm.

Jrb, Viešvilė, 12.VI.1992, I ♂, mixed forest on swampy bank of the Viešvilė.

23. *Coslichneumon nobilis* Wesm.

Vlkv, Gižai, II.VI.1992, I ♂, deciduous woods on farmland.

23 naujos Lietuvos ichneumonidų (Hymenoptera, Ichneumonidae)

rūšys, rastos 1974, 1986 ir 1992 m.

Jonaitis V.

Resümé

Iš medžiagos, surinktos šio pranešimo autoriaus ir kitų rinkikų (A. Jakimavičiaus, S. Pakalniškio) 4 Lietuvos administraciniuose rajonuose (Jurbarko, Prienų, Tauragės, Vilka iškio) ir Vilniaus mieste, apibūdintos 23 naujos Lietuvos ichneumonidų rūšys, priklausantios 21 genčiai.

Nurodoma kiekvienos rūšies radimo vieta ir data, rastųjų egzempliorių skaičius, lytis, rinkikas bei biotopas.

23 Новых для Литвы видов насекомых-ихневмонид (Нименоптера, Ichneumonidae), обнаруженных в 1974, 1986 и 1992 г.

Резюме

Из материала, собранного автором, сообщения и другими

сборщиками (С. Пакальнишкисом, А. Якимовичем) в 4 административных районах Литвы (Вилькавишском, Пренайском, Таурагском, Юрбаркском) и в городе Вильнюс, определено 23 новых для Литвы видов насекомых-ихневмонид, принадлежащих к 21 роду.

Для каждого вида указано место и дата нахождения, количество и пол собранных экземпляров, сборник и биотоп.

New and rare for Lithuania insect species. Records and descriptions of 1993

5 NEW FOR LITHUANIA SPECIES OF BEES (HYMENOPTERA, APOIDAE)
FOUND IN 1978-1992

Monsovičius virg.

This report is a continuation of earlier published by author data about new to Lithuania species of bees /1-4/.

The material was collected in 1978-1992 by author, 2 specimens by E.Budrys and A.Gudjonytė in 9 administrative districts of Lithuania: Akmenė (v. Gudai), Alytus (tsh. Daugai), Anykščiai (v. Elmininkai, tsh. Troškūnai), Kaunas (v. Lapės). Lazdijai (v. Padūsiai, tsh. Seirijai), Prienai (tsh. Jieznas), Tauragė (Nat. R. Viešvilė), Telšiai (v. Obiškė), Varėna (Nat. R. Čepkeliai, v. Gudakiemis, v. Kapiniškės, v. Kriokšlys) as well as in the towns of Kėdainiai and Vilnius.

The material has been determined by the author of this report and is preserved in the collection of the Čepkeliai Nature Reserve.

Check-list of species

I. Holictidae

1. *Sphecodes hyalinatus* Hagens

AKM, Gudai, 16.V.1989, 1♀, rivers valley in agricultural

© Institute of Ecology, 1993

landscape; An, Elmininkai, 1.VIII.1983, 2♂, on *Pimpinella* sp., rivers valley in agricultural landscape; Tiš, Obiškė, 18.VII.1986, 1♀, on *Umbelliferae*, rivers valley in agricultural-forest landscape; Vrn, Kriokšlys, 17.V.1984, 1♀, on *Taraxacum officinale*, rivers valley in pine forest; Vilnius, 6.V.1978, 1♀ (Budr.), on *Potentilla* sp.

Distribution: temperate Europe (up to 68° N).

2. *S. niger* Hagens

Al, Daugai, 12.V.1991, 1♀, on *Senecio vernalis*, gravelpit in agricultural-forest landscape.

Distribution: Europe (between 42° and 57° N, up to 30° E), West Asia (Turkey).

3. *S. ruficrus* sep. *rubricundus* Hagens

Lzd, Seirijai, 25.VI.1992, 1♀, on *Anthemis tinctoria*, dry meadow on hills slope in agricultural-forest landscape.

Distribution: Europe (up to 56° N), West Asia (Turkey). A northern border of the distribution area pass through Lithuania.

II. Anthophoridae

4. *Nomada conjungens* H.-Sch.

Kn, Lapės, 18.V.1989, 2♂, on *Veronica* sp., rivers valley in agricultural landscape; Lzd, Padūsiai, 7.VI.1991, 2♀, slope on lake bank in agricultural landscape; Kėdainiai, 18.V-3.VI.1991, 1♂♂, 24.V.1992, 1♂, on *Fragaria vesca*, *Umbelliferae*, rivers valley in agricultural-urban landscape.

Distribution: Europe (up to 56° N and 30° E), North Africa, West Asia (Turkey). A northern border of the distribution area pass through Lithuania.

III. Apidae

5. *Bombus semenoviellus* Skorikov

Al, Daugai, 8.VII.1986, 1♂, on unidentified yellow

bloom species of Compositae, forest glade in agricultural-forest landscape; An, Troškūnai, 19.VI.1984, 1♂, on *Hypochaeris radicata*, meadow in agricultural-small forest landscape; Lzd, Seirijai, 16.VI-7.VIII.1986, 2♀, on *Anthemis* sp., *Centaurea* sp., gravelpit and dry meadow in agricultural-small forest landscape; Prn, Jiezna, 3.V.1986, 1♀, on *Acer platanoides*, in agricultural-forest landscape; Trg, Viešvilė, 17.VI.1992, 1♂ (Ovi.); Vrn, Čepkeliai, Gudakiemis, Kapiniškės, 14.VII.1983, 1♂, 2.VIII.1986, 1♀, 6.VII.1987, 1♀, on *Knautia arvensis*, *Anchusa officinalis*, *Urtica dioica*, swamp meadow in the forest and meadows in agricultural-forest landscape.

Distribution: East Europe (between 53° and 58° N, up to 22° E (in Lithuania), North Asia (up to 67° N and 120° E). A western border of the distribution area pass through Lithuania.

Conclusion

1. From the material collected in 1978-1992 by Virg. Monsevičius, E. Budrys and A. Gudjonytė in 9 administrative districts and 2 towns of Lithuania 5 species of bees (Hymenoptera, Apoidea) belonging to 3 families new to Lithuania have been determined.

2. A northern border of the distribution areas of 2 species (*Sphexcodes ruficrus* ssp. *rubicundus* Fugens and *Nomada conjugans* H.-Sch.) and the western border of 1 species (*Bembix semenoviellus* Scop.) pass through Lithuania.

Rezumė

Iš medžiagos, surinktos Virg. Monsevičiaus, E. Budrio ir

A. Gudjonites 9 Lietuvos administraciniuose rajonuose bei Kėdai-
nių ir Vilniaus miestuose, apibūdintos 5 naujos Lietuvos bičių
rūsys, priklausančios 3 Šeimoms.

Per Lietuvą einai 2 naujai rastų rūsių (*Sphaecodes ruficrus*
ssp. *rubicundus* Hagens ir *Nomada conjungens* H.-Sch.) arealų
žiaurintų ribos ir rūšies *Bombus semenoviellus* Skorikov arelo va-
karinė riba.

Nurodyta kiekvienos rūšies radimo vieta, data, rastųjų eg-
zempliorių skaičius ir lytis, mišybiniai augalai, biotopas bei
paplitimas.

5 новых для Литвы видов пчелиных (Hymenoptera, Apoidea), обнару-
женных в 1970-1992 гг.

Монсивичс Вирг.

Резюме

Из материала, собранного в 1978-1992 гг. Вирг. Монсивичесом,
В. Бутисом и А. Гуджоните в 9 административных районах и 2 горо-
дах Литвы, определено 5 новых для Литвы видов пчелиных, принадле-
жащих к 3 семействам.

В Литве проходят северные границы ареалов 2 впервые обнару-
женных автором сообщения в республике видов пчелиных (*Sphaecodes*
ruficrus ssp. *rubicundus* Hagens и *Nomada conjungens* H.-Sch.) и
западная граница ареала вида пчелиных *Bombus semenoviellus* Skor.

Для каждого вида указаны: место и дата нахождения, количест-
во и пол собранных экземпляров, кормовые растения, биотоп и рас-
пространение.

New and rare for Lithuania insect species. Records and
descriptions of 1993

92 NEW FOR LITHUANIA SPECIES OF GALL MIDGES (DIPTERA,
CECIDOMYIIDAE), FOUND IN 1987-1992

Spungis V.

S. Pakalniškis /2/ presented a list of Diptera from Lithuania.
It includes 130 species of gall midges, mainly phytophagous spe-
cies. *D. trifolii* Kieffer were synonymized uncorrectly, it is an
independent species. Five species - *Lestodiplosis pallidicornis* Kff.,
Physemocecis ulmi Kff., *Polystepha quercus* Kff., *Resseliella theo-
baldi* Barnes and *Tricholaba trifolii* Rb. are included into list but
any references are not given except Catalogue of Palearctic Diptera
/4/. Lithuania and Latvia are commonly mixed up in the European
literature as it may be occurred.

Four fully unidentified species - *Winnertzia* sp., *Camptoryzia*
sp., *Aprionus* sp., *Lestremia* sp. /1/ are not referred. *Miasator met-
raloas* Meinert is recognized under decaying bark of pine stumps /1/.
This fact is doubtful for larvae of this species are living only
under decaying bark of deciduous trees.

B. Mamaev /3/ described new genus and new species *Stomatocol-*
podia iridis Mam. from Lithuania (Nat.R. Žuvintas, 9.VII.1969), the
larvae of which live in the leaf sheaths of *Iris pseudacorus* L.

V. Spungis /5/ mentioned *Winnertzia tridens* Pan. (Naujoji Akmenė,

12.V.1987 and Karmėlava, 21.VIII.1988). So 133 species of gall midges are known in Lithuania now.

Gall midges were investigated by the author during 1987-1989 inside the research program of Baltic region gall midges. The investigations of previous students included phytophagous species, except few mycophagous and zoophagous ones. We emphasized our investigation on free-living species. Entomological net and aspiration apparatus were used to catch adults. Few larvae were extracted from soil samples. Galls caused by gall midges were gathered too. Localities were named for the nearest toponym. The material was collected in 21 administrative districts of Lithuania: Akmenė (tsh. Naujoji Akmenė), Alytus (Nat.R. Žuvintas), Ignalina (tsh. Dūkštas, Palūšė), Jonava (v. Dumsiai, v. Vanagiškis), Joniškis (v. Butaučiai, V. Jakiškiai), Kaunas (tsh. Garliava, tsh. Karmėlava), Klaipėda (v. Dituva), Kretinga (tsh. Kartena), Lazdijai (v. Meteliai, v. Šaulėnai), Marijampolė (v. Igliauka), Mažeikiai (tsh. Seda, tsh. Tirkeliai), Plungė (tsh. Plateliai, tsh. Varduvė), Prienai (v. Naujbjū Uta), Šeščininkai (v. Rūdninkai), Šiauliai (tsh. Meškučiai), Šilutė (tsh. Pagėgiai, v. Saugos, v. Usėnai), Švenčionys (tsh. Fabradė, v. Favoverė, v. Sariai), Varėna (tsh. Merkinė, v. Pirčiupiai, tsh. Valkininkai), Vilnius (tsh. Nemenčinė, v. Voskonya), Zarasai (v. Smalvos) and in the towns of Ignalina, Jonava, Joniškis, Kėdainiai, Klaipėda, Kretinga, Mažeikiai, Neringa, Prienai, Švenčionys, Zarassai. Author expresses his acknowledgement to Dr. R. Rakauskas for reviewing the manuscript. A collection of gall midges is deposited in the Institute of Biology of Latvian Academy of Sciences, 3 Miera Str., Salaspils, LV 2169, Latvia.

Check-list of species

1. *Anaretella bicincta* Mam.

Al, Žuvintas, 20.VIII. 1988, 4 spec.; Jo, Dumsiai, 21.VIII. 1988, 2 spec.; Krtn, Kartena, 22.VIII.1989, 1 spec., in forests.

2. *Lestremia cinerea* Moq.

Ignalina, 16.VIII.1988, 2 spec.; Ign, Palčė, 16.VIII.1988, 1 spec.; Švnč, Favoverė, 17.VIII.1988, 10 spec.; V, Nemenčinė, 17. VIII.1988, 1 spec.; Šlčn, Rūdninkai, 18.VIII.1988, 1 spec.; Vrn, Merkinė, 19.VIII.1988, 2 spec.; Lzd, Meteliai, 19.VIII.1988, 1 spec., in forests.

3. *L. leucophaea* (Mg.)

Lzd, Meteliai, 19.VIII.1988, 1 spec.; Mžk, Seda, 22.VIII. 1989, 3 spec.; Šlu, Usėnai, 24.VIII.1989, 1 spec., in forests.

4. *Aprionus acutus* Edw.

Švčn, Sariai, 17.VIII.1988, 1 spec.; Jo, Vanagičkis, 21.VIII. 1988, 5 spec., in forests.

5. *A. sequatus* Mam.

Klp, Dituva, 23.VIII.1989, 1 spec., in pine-oak forests.

6. *A. bispinosus* Edw.

Švčn, Sariai, 17.VIII.1988, 1 spec.; Jo, Dumsiai, 21.VIII. 1988, 2 spec., in forests.

7. *A. dentifer* Mam.

Mžk, Seda, 22.VIII.1989, 10 spec.; Šlu, Usėnai, 24.VIII.1989, 2 spec., in forests.

91. *Profeltiella meridionalis* (Mam.)

V, Voskonys, 17.VIII.1988, 2 spec., in alder forest.

92. *Stroblophila aberrans* (Kff.)

Švnč, Patradė, 17.VIII.1988, 1 spec.; Lzd, Šaulėnai, 19.VIII.1988, 1 spec., in forests.

Conclusion

Article contains data on 92 new species of gall midges for Lithuania, so 225 species were recognized here together now. It would be approximately one third of total number of species, so these investigations must be continued. One species *Stomatosema iridis* Mam. is known only from Lithuania, it is not found anywhere yet. Other species posses wide distributional areas. Areas will be precisely when the fauna of gall midges will be investigated better than now. Occurance of species is scanty investigated therefore that is not mentioned here.

92 новых для Литвы видов галлиц (Diptera, Cecidomyiidae) обнаруженных в 1987-1989 гг.

Spungis V.

Reziumė

Iš medžiagos, autorius surinktos 21 Lietuvos administraciiniame rajone ir II miestų, apibūdintos 92 naujos Lietuvos gumbauodžių (Diptera; Cecidomyiidae) rūšys. Šiuo metu Lietuvoje žinomas 225 gumbauodžių rūšys.

Nurodoma kiekvienos rūšies radimo vieta, data, retujių egzempliorių skaičius, biotopas.

92 новых для Литвы видов галлиц (Diptera, Cecidomyiidae), обнаруженных в 1987-1989 гг.

Спуньгис В.

Резюме

Из материала, собранного автором в 1987-1989 гг. в 21 административном районе и II городах Литвы, определены 92 новых для Литвы видов галлиц. Таким образом вместе с уже опубликованными данными в Литве известны 225 видов галлиц.

Для каждого вида указаны место и дата нахождения, количество собранных экземпляров и биотоп.

New and rare for Lithuania insect species. Records and descriptions of 1993

SCATOPSIDAE FROM LITHUANIA. A FIRST FAUNISTIC NOTE (DIPTERA, NEMATOCERA)

Haenni J.-F.

Up to now little attention has been paid to the family Scatopsidae in Lithuania. Only one species, Reichertella nigra (Meig.), has been recorded so far from this country (Krivosheina and Haenni, 1986; Пакальнишкис, 1969).

Sigitas Podėnas, University of Vilnius, passed to me for study a small collection of these little nematocerous flies collected in 1968-1991 by A. Stanionytė, S. Pakalniškis, J. Sirvinėkas, A. Jakimavičius in 7 administrative districts of Lithuania: Kelmė (v. Šimėa), Kretinga (v. Egliškiai), Marijampolė (v. Miknonyse), Molėtai (teh. Alanta), Rokiškis (exact locality unknown), Šilutė (v. Girininkai), Švenčionys (v. Prudiškė), Vilnius (v. Geisiškės) as well as in the town of Akmensė and Vilnius city (sub. Verkiai). I thank gratefully S. Podėnas for kindly providing this material.

Ten species are presented in this collection, all being apparently new for Lithuanian fauna.

List of species

1. Anapausis rectinervia Duda, 1928

Klaipėda, Šimėa, 18.V.1990, 1♂ (leg. A.Stanionytė).

Known from Sweden, Finland, Denmark, Germany, France and

Switzerland, where it seems to be restricted to peat-bogs.

2. *Anapausis talpae* (Verrall, 1912)

Akmenė, 11.VII.1984, 1♀ (leg. S.Pakalniškis).

Known from Sweden, Poland, Central and Western Europe.

3. *Rhegmoclema collini* Cook, 1969

Švnč, Prūdiškė, 27.VI.1983, 1♂ (leg. Stanionytė).

Recorded from Sweden, Poland, Central and Western Europe.

4. *Rhegmoclema edwardai* (Collin, 1954)

Mrj. Miknony, 29.VI.1982, 1♀ (leg. A.Stanionytė); Mlt.,

Alanta, 19.VI.1986, 1♂; Vilnius, Verkiai, 18.VI.1986, 1♂ (leg. S.Pakalniškis).

Known from Sweden, Finland, Latvia, Central and Western Europe.

5. *Rhegmoclema freyi* Cook, 1969

Mlt, Alanta, 19.VI.1986, 1♀ 1♂; Vilnius, Verkiai,

18.VI.1986, 1♂ (leg. S.Pakalniškis).

This rare species was described from female specimens only from Sweden (Lund) and Finland (Saltvik, Åland Islands) by Cook (1969). The male was discovered only recently by Martinovský and will be described by this author in a paper in preparation about *Rhegmoclema* in Czechoslovakia. The Lithuanian male specimen from Vilnius mentioned above is conspecific with the Czechoslovak specimens (Martinovský, in litt.).

6. *Rhegmoclema halteratum* (Meigen, 1838)

Mrj, Miknony, 29.VI 1982, 1♂ (leg. A.Stanionyte).

This is the commonest species of the genus. It is widespread over all Europe, except the Mediterranean region. In the

North-Eastern Europe it has been recorded from Sweden, Finland, Germany, Poland and Russia.

7. *Reichertella geniculata* (Zetterstedt, 1850)

V, Geisiškės, VI.1991, 21♀ 12♂ (leg. J.Širvinskas).

Widespread in Europe, except in the South.

8. *Colobostema tristae* (Zetterstedt, 1850)

Švnč, Prūdiškė, 27.VI.1983, 1♂ (leg. A.Stanionytė).

Widespread in Europe. In the Baltic area already recorded from Denmark, Sweden, Finland, Germany and Poland.

9. *Cookella albitarsis* (Zetterstedt, 1850)

Rk, 19.VII.1968, 1♀ (leg. A.Jakimavičius).

Widespread in Europe, except the Mediterranean region. In North-Eastern Europe known from Sweden, Finland, Germany and Russia.

10. *Coboldia fuscipes* (Meigen, 1830)

Krtn, Egliškiai, 19.VIII.1983, 1♂; Šlu, Girininkai, 4.VI.1986, 1♂ (leg. S.Pakalniškis).

An anthropogenic cosmopolitan species which also occurs under natural conditions in Europe.

Practically all the species listed above are inhabitants of open biotopes, wet meadows and marshy areas in particular. This is especially true for species of the genera *Rhegmoclema* and *Anapausis* making up the better half of the recorded species. However, only 11 species of Scatopsidae are known so far from Lithuania and there is no doubt that this number will substantially increase by extending research to other biotopes. As an illustration, I can quote the extent of investigation of Sea-

Scatopsidae of neighbouring countries where the number of these species amounts to 37 in Sweden (Andersson, 1982) and 26 in Finland (Hackmann, 1980).

New and rare for Lithuania insect species. Records and descriptions of 1993

SOME AGROMYZIDAE (DIPTERA) SPECIES FOUND IN LITHUANIA FOR THE FIRST TIME

Pakalniškis S.

The material was collected between 1985 and 1992 in 19 administrative districts of Lithuania: Biržai (v. Drąseikiai), Ignalina (v. Antagavė, t.t.s. Visaginas, v. Vosyliškės), Kaunas (v. Aukštakalniai, v. Noreikiškės, v. Pavejuonis, v. Ringovė), Kelmė (v. Pažerys, v. Šimša, v. Užpelkiai), Kretinga (v. Kalnaliai, v. Vydmantai), Kupiškis (v. Ažubaliai, v. Kairiai), Panevėžys (v. Jatrica, fms. Klimbalė, fms. Ropidai, v. Uoselys), Plungė (v. Stalgėnai), Prienai (v. Birštonas), Radviliškis (v. Liepinė), Šilalė (v. Žadeikiai), Šilutė (v. Lazdėnai), Švenčionys (v. Laukagalė, v. Varakalniai, v. Vilkasale), Telšiai (tsh. Gaudėnava, v. Pagirgždutis), Trakai (v. Čižiūnai), Ukmergė (tsh. Vidiškiai, v. Zujai), Varėna (tsh. Merkinė), Vilkaviškis (t. Kybartai), Vilnius (v. Trakų Yokė) as well as in town of Palanga and Vilnius city (sub. Verkiai) and is preserved in the Institute of Ecology.

I am very much obliged to Dr V.V. Zlobin for the identifying some species and viewing of my identifications.

List of species

1. *Melanagromyza artemisiae* Spencer

Vilnius, Verkiai, 31.I.-19.III.1990, the puparia in the

stems of *Artemisia vulgaris*, imago 22.II-9 IV, 1♀1♂.

2. *Melanagromyza chaerophylli* Spencer

Kn, Ign, Klm, Krtn, Kp, Šll, Šlu, Trak, Ukm, Vilnius, 1♀22♂ were caught in late May, early June and late July, the other specimens were reared from *Anthriscus sylvestris* (7♀4♂), *Chaerophyllum aromaticum* (1♀) and *Heracleum sibiricum* (4♀2♂). This series and also 12 specimens from Belorussia, Latvia and Kaliningrad region of Russia can be definitely partially as *Melanagromyza nigriissima* Spenc. no displaying some kind of expressed boundary between these both species.

3. *Melanagromyza polemonii* Rohdendorf

Vilnius, Verkiai, 29.III.1990, the puparia in the stems of *Polemonium caeruleum*, imago 6-9.IV, 9♀2♂.

4. *Melanagromyza symphyti* Griffiths

Kn, Noreikiškės, 6.VIII.1989, the larvae in a stem of *Symphytum officinale*, imago XII.1989-I.1990, 2♀.

5. *Ophiomyia melandrica* Hering

Ign, Antagavė, 15.VII.1989, a puparium on *Holosteum umbellatum*, imago 26.VII, 1♀.

6. *Ophiomyia ononidis* Spencer

Kn, Ringovė, 20.VII.1990, the puparia on *Ononis arvensis*, imago 26-30.VII, 2♀1♂.

7. *Agromyza flavipennia* Hendel

Palanga, 18.VI.1992, the larvae in the mines on *Lamium album*, imago II-III.1993, 2♂.

8. *Agromyza lathyri* Hendel

Vrn, Merkinė, 17.VI.1989, the larvae in the mines on *Pisum sativum*, imago 11-15.I.1990, 2♀.

9. *Agromyza lucida* Hendel

Švnč, Varakalniai, 22.V.1990, 1♀; Klm, Užpelkiai,

18.V.1990, 1♂.

10. *Agromyza nigrella* (Rondani)

Kn, Ringovė, 8.VI.1990, 1♀; Kp, Ažubaliai, 28.V.1990, 1♂;

Pn, Klimbalė, 13.VI.1990, 1♂.

11. *Agromyza nigrescens* Hendel

Kn, Aukštakalniai, 8.VI.1990, 1♀1♂, Ringovė, 20.VII.1990,
the larvae in the mines on *Geranium pratense*, imago 10-17.VIII.,
1♀1♂

12. *Agromyza orobi* Hendel

Švnč, Laukagalis, 22.V.1990, 1♀.

13. *Agromyza pseudorupiphipes* Nowakowski

Rd, Liepinė, 5.VI.1986, 1♂.

14. *Agromyza rondensis* Spencer

Brž, Drąseikiai, 22.VII.1987, 1♂; Kn, Pavejuonis,
9.VI.1990, 1♂.

15. *Agromyza rufipes* Meigen

Vilnius, Verkiai, 5.IX.1989, the larvae in the mines on *Artemisia vulgaris*, imago II.1990, 2♂.

16. *Agromyza spenceri* Griffiths

Pn, Ropidai, 13.VI.1990, 1♂.

17. *Cerodontha* (*Cerodontha*) *stackelbergi* Nowakowski

Pn, Jstrica, 12.VI.1990, 1♂; Uoselys, 14.VI.1990, 1♂.

18. *Cerodontha* (*Poemyza*) *inconspicua* (Malloch)

Ign, Klm, Kn, Pn, Švnč, Ukm, Vilnius, from late May up to
middle of August, 24♀12♂. Found also in the North-West of Belo-
russia.

19. *Cerodontha* (*Poemyza*) *phragmitidis* Nowakowski

Kn, Pavejuonis, 9.VI.1990, 1♀.

20. *Cerodontha* (*Butomyza*) *scirpi* (Karl)

Klm, Pažerys, 19.V.1990, 1♀; Pn, Jstrica, 12.VI.1990, 1♀.

21. *Cerodontha* (*Butomyza*) *scutellaris* (von Roser)

Vlkv, Kybartai, 21.VI.1987, 1♂.

22. *Cerodontha* (*Dizygomyza*) *caricicola* (Hering)

Vilnius, Verkiai, 14.VII.1988, 1♀.

23. *Cerodontha* (*Dizygomyza*) *elbergi* Nowakowski

Kn, Ringovė, 15.VIII.1990, 1♂, 29.V.1992, 1♂; Klm, Paže-
rye, 19.V.1990, 1♀; Švnč, Laukagalis, 29.V.1990, 1♂ (all det.
V.V. Zlobin).

24. *Liriomyza cicerin* (Rondani)

Prn, Birštonas, 29.V.1992, 5♀5♂.

25. *Liriomyza eupatoriana* Spencer

Vilnius, Verkiai, 7.VI.1985, a larva in a mine on *Eupato-*
rium cannabinum, imago 28.VI, 1♂, 9.VII.1985, a puparium on *E.*
cannabinum, imago 14.VII, 1♂. This species was found also in
the Kaliningrad region of Russia and was incorrectly recorded
(Пакальнишкис, 1990) as *Liriomyza eupatorii* (Klbt.).

26. *Liriomyza puella* (Meigen)

V, Traku Vokė, 14.VIII.1991, a larva in a mine on *Cichori-*
um intybus, imago 31.I.1992, 1♀.

27. *Liriomyza virgula* Frey

Kn, Pavejuonis, 9.VI.1990, 4♀4♂; Ringovė, 8.VI.1990, 1♀1♂;

Krtn, Kalnalis, 9.VI.1989, 1♂; Vilnius, Verkiai, 6.VI.1988, 1♂.

28. *Phytoliriomyza variegata* (Meigen)

Prn, Birštonas, 29.V.1992, 1♀.

29. *Aulagromyza fulvicornis* (Hendel)

Vrn, Merkinė, 16.V.1988, 1♀.

30. *Aulagromyza lucens* (de Meijere)

Ukm, Zujai, 30.V.1991, 3♀2♂; Vrn, Merkinė, 23.V.1987, 1♂.

This species was found also in the Kaliningrad region of Russia
and was incorrectly recorded (Пакальнишкис, 1990) as *Paraphyto-*

Napomyza buhri (Meij.).

31. *Phytomyza albifrons* Groschke

Pln, Stalgėnai, 9.VI.1989, a larva in a mine on *Thalictrum aquilegifolium*, imago 26.VI, 1♂ (det. V.V. Zlobin).

32. *Phytomyza glabra* Hendel

Trak, Čižionai, 7.VII.1991, the larvae in the stem-mines *Anthriscus sylvestris*, imago 3-12.II.1992, 2♀.

This minute species is sufficiently close to *Phytomyza spoliata* Strobl, and its transferring to genus *Napomyza* is not argumentated morphologically enough. The larvae develop in the whitish linear mines on the stems (not internal borers), the pupation occur normally out of mine (many observations in the Ignalina env.). The puparium is not pale yellow but brown, it is not membranous as in *Napomyza*, not so tapering as shown in (Spencer, 1976, Fig. 309) and its form is typical to *Phytomyza*.

33. *Phytomyza lycopi* Nowakowski

Pln, Ropidai, 13.VI.1990, 1♂, Uoselys, 1.VII.1990, the larvae in the mines on *Lycopus europaeus*, imago 10.VIII.1990-III.1991, 2♀1♂.

34. *Phytomyza petoei* Hering

Kn, Ringovė, 29.V.1992, 3♂.

35. *Phytomyza podagrariae* Hering

Kn, Ringovė, 15.VIII.1990, 1♂ (det. V.V. Zlobin).

36. *Phytomyza ptarmicae* Hering

Vilnius, Verkiai, 14.VII.1988, 1♂.

37. *Phytomyza symphyti* Hendel

Krtn, Darbėnai, 11.VII.1986, 1♂; Vrn, Viečiūnai, 5.VIII.1986, 1♂ (both det. V.V. Zlobin).

38. *Phytomyza veronicicola* Hering

Švnč, Vilkasalė, 22.V.1990, 1♂.

Male of *Agromyza spenceri* Griff. is the most interesting find, which was caught in the small plain by the small forest river for the first time not in France.

Pakalniškis S.

Reziumė

Apibūdintas medžiagą, surinktą autoriaus 1985-1992 m. išvairiuose Lietuvos rajonuose, išaiškintos 38 minamusiu (Diptera, Agromyzidae) rðäys, naujos šalies faunai. Murodomos kiekvienos rðäies radimo vietas ir datos.

Несколько видов минирующих мух, впервые обнаруженных в Литве

Пакальнишкис С.

Резюме

В заметке приведены данные о 38 видах минирующих мух (Diptera, Agromyzidae), новых для фауны Литвы.

New and rare for Lithuania insect species. Records and descriptions of 1993

THE CHECK-LIST OF DRAGONFLIES (ODONATA) OF LITHUANIA

Stanionytė A.

A systematic list of the Lithuanian dragonflies made of the material collected by the author in 1958-1992 and from known literature sources is presented.

The material was collected in 33 administrative districts of Lithuania: Akmenė (v. Alkiškiai, Nat. R. Kamanos), Alytus (v. Vaickūniškės, Nat. R. Žuvintas), Anykščiai (v. Jakšiškis, tsh. Skiemony, tsh. Svedasai), Biržai (f. Biržų Giria, v. Būginiai, v. Daudžgiriai, v. Gavėniškis, v. Kirkilai, v. Klausučiai, v. Kuokaviečiai, v. Kupuliškis, v. Latvygala, v. Lebeniškiai, v. Fabiržė, v. Papilys, v. Sližiai, v. Smaragdava, f. Užušilių Šilas), Ignalina (v. Antagavė, tsh. DGkštas, v. Ginučiai, v. Motiejūnai, v. Šaškės, t.t.s. Visaginas, v. Vosyliškės), Jonava (v. Rukla), Jurbarkas (v. Kalveliai, tsh. Viešvilė), Kaišiadorys (v. Bačkony), Kaunas (tsh. Babtai, v. Pavejuonis, v. Ringovė, v. Romainiai), Kelmė (v. Kleitiškiai, v. Pažerys, marsh Tytuvėnų Tyrelis, v. Šimša, v. Užpelkiai), Kleipėda (v. Kalotė), Kretinga (v. Kalnalis, tsh. Kartena, v. Žudgalis), Kupiškis (tsh. Antakava, v. Ažubaliai, v. Kairiai, tsh. Salamiestis), Lazdijai (v. Akmenynė, L. Balsio Ežeras, v. Kabeliai, v. Krikštonys, v. Pateriai, tsh. Šeštakai, v. Varviškė, L. Vernijis), Marijampolė (v. Jūrė, tsh. Kazlų Rūda, v. Puškepur'ai, L. Žaltytis), Molėtai (tsh. Alančia, v. Bareikiai, tsh. Dubingiai, L. Gilučis, v. Pažuoliai, v.

Ridvoniškiai, v. Užugiriai, v. Vanaginė, v. Voroniai, v. Žibėčiai), Panevėžys (v. Daukšenai, v. Istrica, fms. Klimbalė, v. Mitsbynė, fms. Ropidai, v. Stumbriškis, v. Uoselys), Plungė (v. Akmenakinė, v. Beržoras, v. Grąžčiai, v. Kapsūdžiai, v. Kulskiai, for. Skroblė, v. Stalgėnai, v. Šarkiai, v. Vilkaičiai), Radviliškis (f. Bargailių Miškas, v. Liepinė, pr. Praviržulis), Rokiškis (v. Aleknas, tsh. Obeliai, v. Panemunis, v. Stumbriškis), Šiauliai (v. Šarkėnai, v. VerbOnai), Šilalė (v. Billony, v. Pykaičiai, v. Šiauduva), Šilutė (L. Krokų Lanka, v. Lazdėnai, v. Keškinė, tsh. Pagėgiai, v. Piktupėnai, hill. Rambynas, v. Ventė), Širvintos (L. Dudėnų Ežeras, L. Kamaraučiznos Ežeras, tsh. Kernavė, L. Naldos Ežeras, L. Salų Ežeras), Švenčionys (v. Antaliadė, tsh. Kaltanėnai, tsh. Labanoras, v. Laukagalė, v. Lukna, v. Obelų Ragas, v. Paluknys, v. Paminėlė, v. Šiliškė, v. Varakaliai, v. Vilkasalė), Tauragė (for. Bičiai, v. Kuisiai, tsh. Skaudvile), Telšiai (v. Česniasi, L. Didovo Ežeras, v. Liepkalnis, v. Nevardėnai, v. Pagiždutis, v. Ryškėnai, v. Upyna), Trakai (tsh. Aukštadvaris, v. Bagdononys, v. Čižionai, v. Dembina, v. Frūdžionys, v. Šventininkai, v. Žydiškės, tsh. Vievis), Ukmergė (v. Laumėnai, v. Nuotekai, tsh. Siesikai, v. Šinkūnai, tsh. Vepriai, v. Zujai, tsh. Žemaitkiemis), Varėna (L. Grūda, L. Glynas, L. Kastinis, L. Levynes, v. Lynežeris, v. Margiai, v. Marcinkonys, tsh. Merkinė, tsh. Perloja, pr. Skroblus, v. Subartony, env. L. Trikampis, L. Versmis' Vilkaviškis (v. Alvitas, tsh. Kybartai, v. Kumečiai, v. Paežeriai, v. Podvarkas, v. Stirniškiai, f. Uocijos Miškas), Vilnius (v. Aukštadvaris, v. Avižieniai, v. Balkūnai, v. Bezdony, v. Danilava, v. Glatkiškės, v. Laoriškės, tsh. Maišiagala, tsh. Medininkai, v. Nem'žis, v. Trakų Vokė), Zarasai (L. Čičirys, tsh. Dusetos, v. Kimbariškė, v. Pasmalvės, v. Smalvos, v. Tilžė, v. Vyšniava) and in the towns of Akmenė, Alytus, Anykščiai, Biržai, Jurbark-

kas, Kaunas, Klaipėda (sub. Giruliai, sub. Smiltynė) Landijai, Heringa (settlements Juodkrantė, Nida, Pervalka, Preila), Fabrėdė, Palanga, Panevėžys, Radviliškis, Širvintos, Tauragė, Trakai, Ukmergė, Varėna, Vilkaviškis and Vilnius city (suburbs: Jeruzalė, Naujieji Verkiai, Pavilnys, Pilaitė, Verkiai).

At present in Lithuania 59 species and 17 aberrations of dragonflies belonging to 5 families and 24 genera are recorded.

For each listed species the literature sources in which it has been mentioned, as well as its locality are indicated.

Check-list of species

Z Y G O P T E R A

Calopterygidae

1. *Calopteryx virgo* (Linné, 1759) /2,5,8,9,10,II,12,13,14,15/, Vilnius, Al., An., Brž., Ign., Klm., Kn., Kp., the Kuršių Spit., Lsd., Mlt., Pln., Pn., Rd., Šl., Šli., Šlu., Šr., Švnč., Vlkv., Vrn., Zr.; ab. *festiva* Brulle /2,5/, V.; *virgo virgo* L. /2/, V.
2. *Calopteryx splendens* (Harris, 1782) /2,5,6,8,9,10,II,12,13,14,15,17/, Akmenė, Vilnius, Al., An., Brž., Jrb., Klm., Kš., Lsd., Mrj., Pln., Pn., Rd., Rk., Šl., Šr., Švnč., Ukm., Vlkv., Vrn., Zr.; ab. *ancilla* Hog. /5,9,II/, Brž., V., Vrn.; ab *tum-peli* Scholz. /2,5/, Vilnius, V.

Agrionidae

3. *Lestes viridis* (Vander Linden, 1825) V. Vlkv.
4. *Lestes virens* (Charpentier, 1825) /5,8,9,13,14,15,17/, Vilnius, Al., Brž., the Kuršių Spit., Mrj., Rd., Ukm., Švnč., Vlkv.
5. *Lestes dryas* Kirby 1890 /2,5,8,9,10,12,13,14,17/, Anykščiai, Biržai, Kaunas, Vilnius, Al., Brž., Ign., Jrb., Klm., Klp., Krtn., Kš., the Kuršių Spit., Pln., Pn., Rd., Rk., Šl., Šli., Šlu.,

- Švnč., Trak., Ukm., V., Vrn., Zr.
6. *Lestes sponsa* Haneemann, 1823 /2,5,6,8,9,10,12,13,14,15,17/. Anykščiai, Biržai, Vilnius, Al., Brž., Kš., Mrj., Rd., Rk., Šl., Šli., Šlu., Švnč., Trak., Ukm., V., Vrn.
7. *Sympetrum annulata* (Bianchi, 1902) /7,8,13,14,15,17/, Vilnius, Al., Ign., Rd., V.
8. *Platycnemis pennipes* (Pallas, 1771) /2,5,6,8,9,10,12,13,14,15,17/, Biržai, Vilnius, An., Ign., Jrb., Jn., Klm., Kn., Krtn., Kš., Lsd., Mlt., Mrj., Pn., Rd., Šr., Švnč., Trak., Trg., Ukm., V., Vrn., Zr.; ab. *lactea* Selys /2,5/, V.
9. *Nehalennia speciosa* (Charpentier, 1940) /13,14/, Vilnius, Brž., Vlkv.
10. *Ichnura elegans* (Vander Linden, 1823) /2,5,6,9,10,12,13,14,15,17/, Vilnius, Al., An., Ign., Klm., Klp., Lsd., Krj., Rk., Šl., Šli., Šlu., Šr., Švnč., Tl., Ukm., Vrn., Zr.
II. *Ichnura pumilio* (Charpentier, 1825) /9,13,14,17/, Kn., Klp., the Kuršių Spit., Tl., Vrn.
12. *Enallagma cyathigerum* (Charpentier, 1840) /2,5,6,7,8,9,10,12,13,14,15,17/, Biržai, Vilnius, Al., An., Brž., Ign., Jrb., Klm., Kn., Kp., the Kuršių Spit., Lsd., Mlt., Mrj., Pln., Pn., Rd., Šl., Šli., Švnč., Tl., Trak., Ukm., Vrn., Zr.
13. *Agrion concinnum* Johansen, 1859 /6,14/, Biržai, Vilnius.
14. *Agrion haemulatum* (Charpentier, 1825) /2,5,6,7,8,9,10,12,13,14,15,17/, Biržai, Vilnius, Al., An., Akm., Ign., Jrb., Klp., Kn., Kp., Krtn., the Kuršių Spit., Mlt., Pln., Pn., Rd., Šl., Šli., Šr., Švnč., Tl., Ukm., V., Vlkv., Vrn., Zr.
15. *Agrion armatum* (Charpentier, 1840) /6,10,14,16,17/, Biržai, Vilnius, Al., Brž., Ign., Klm., Tl.
16. *Agrion lunulatum* (Charpentier, 1840) /2,5,9,II,13,14,15,17/, Biržai, Vilnius, Al., Ign., Mlt., Mrj., Pln., Šlu., Tl., Vlkv., Vrn., Zr.

17. *Agrion pulchellum* Venderlinden, 1823 /2,5,6,10,12,13,14,15,
17/, Akmenė, Biržai, Vilnius, Al., Brž., Ign., Jrb., Klm.,
the Kuršių Spit., Mrj., Pn., Šl., Šlu., Šr., Švnč., Ukm., Vlkv.,
Vrn., Zr.
18. *Agrion puella* (Linné, 1758) /2,5,6,8,9,10,12,13,14,17/,
Anykščiai, Biržai, Vilnius, Al., An., Brž., Ign., Jrb., Klm.,
Kp., Krtn., the Kuršių Spit., Mrj., Pln., Pn., Rd., Šl.,
Šll., Šlu., Šr., Švnč., Tl., Trak., Ukm., V., Vrn., Zr.
19. *Erythromma najas* (Hansmann, 1823) /2,5,6,7,8,9,10,11,12,
13,14,15,17/, Biržai, Vilnius, Al., Ign., Jrb., Klm., the Kur-
šių Spit., Lsd., Mrj., Šll., Šlu., Šr., Švnč., Tl., Trak., Ukm.,
V., Vrn.
20. *Pyrrhosoma nymphula* (Sulzer, 1776) /10,12,17/, Vilnius, Akm.,
Jn., Klm., Kā., Krtn., Pln., Pn., Rk., Švenč., Trak., Vrn.

ANISOPTERA

Aeschnidae

21. *Gomphus flavipes* (Charpentier, 1825) /13,14/, Kaunas, Vil-
nius, Šlu.
22. *Gomphus vulgatissimus* (Linné, 1758) /1,2,5,6,9,10,11,13,14,
17/, Anykščiai, Biržai, Panevėžys, Vilnius, Al., An., Brž.,
Ign., Klm., Kp., Lsd., Mlt., Pn., Šr., Tl., Ukm., V., Vrn., Zr.
23. *Ophiogomphus serpentinus* (Charpentier, 1825) /2,5,9,13,14,
17/, Anykščiai, Biržai, Vilnius, Šlu., Ukm., V., Vlkv., Vrn.,
Zr.
24. *Onychogomphus forcipatus* (Linné, 1758) /2,5,10,12,13,14,17/,
Vilnius, Brž., Ign., Mlt., Pn., Švnč., Trak., Zr.
25. *Brachytron praetense* M. Ier, 1764 /6,9,13,14,15,17/, Biržai,
Vilnius, Al., Brž., Ign., the Kuršių Spit., Mlt., Šr., Švnč.,
V., Vlkv., Vrn., Zr.

26. *Aeschna squamata* Müller, 1764 /14/, Vilnius, Vrn.
27. *Aeschna juncea* (Linné, 1759) /2,5,6,7,9,13,14,17/, Vilkaviš-
kis, Vilnius, Al., Klp., the Kuršių Spit., Trg., V., Vlkv.,
Vrn., Zr.
28. *Aeschna viridis* Eversman, 1836 /2,5,12,13,14,15,17/, Biržai,
Vilnius, Al., the Kuršių Spit.
29. *Aeschna cyanea* (Müller, 1764) /2,5,9,10,12,13,14,17/, Vilka-
viškis, Vilnius, Jrb., Klm., Klp., Kp., Rk., Re., Ukm., V.,
Vlkv., Vrn.
30. *Aeschna isosceles* (Müller, 1764) /6,12,13,14,15,17/, Vilnius,
Al., Ign., Mlt., Vlkv.
31. *Aeschna grandis* (Linné, 1758) /2,5,6,7,8,9,10,12,13,14,15,
17/, Vilnius, Al., Ign., Klm., Kp., the Kuršių Spit., Pln., Pn.,
Rd., Šlu., Švnč., Trg., Ukm., V., Vlkv., Vrn.
32. *Aeschna elisabethae* Djakonov, 1922, Biržai.
33. *Aeschna mixta* Latreille, 1805 /13,14,17/, Vilnius, Al., Klp.,
Šlu., Ukm.
34. *Anax imperator* Leach, 1815 /2,3,5,6,10,13,14/, Vilnius,
Ign., Klm., Mlt., Švnč., Vlkv.
35. *Anax parthenope* Selys, 1839 /6,13,14/, Trakai, Vilnius, Lsd.,
Mlt., Vlkv.
- ##### Cordulegasteridae
36. *Cordulegaster annulatus* (Latreille, 1805) /5,9,17/, Kn.
Švnč., V., Vrn.
- ##### Libellulidae
37. *Epitheca bimaculata* (Charpentier, 1825) /2,5,10,13,14,17/,
Anykščiai, Vilnius, Al., Ign., Klm., Mlt., Šr., Trak., Vrn.
38. *Corulia senea* (Linné, 1758) /1,2,5,6,7,9,10,11,12,13,14,15,
17/, Vilnius, Al., An., Ign., Jrb., Klm., Kā., Mrj., Pn., Šlu.,
Šr., Švnč., Ukm., V., Vrn., Zr.

39. *Somatochlora metallica* (Vander Linden, 1825) /2, 3, 6, 7, 8, 10, 12, 13, 14, 15, 17/, E. r̄ai, Vilnius, Akm., Al., Brž., Ign., Jrb., Klm., Kp., Mlt., Pn., Rd., Šlu., Švnč., Trg., Ukm., Vlkv., Zr.
40. *Somatochlora flavomaculata* (Vander Linden, 1825) /2, 5, 7, 13, 14, 15, 17/, Biržai, Vilkaviškis, Vilnius, Al., Brž., Ign., Jrb., Kp., the Kuršių Spit., Lzd., Mlt., Šlu., Vlkv., Zr.
41. *Somatochlora arctica* (Zetterstedt, 1840) /14/, Biržai, Vrn., Zr.
42. *Orthetrum coerulescens* (Fabricius, 1798) /10, 19/, Švnč.
43. *Orthetrum cancellatum* (Linné, 1758) /2, 5, 6, 10, 12, 13, 14, 17/, Biržai, Trakai, Vilkaviškis, Vilnius, Al., An., Ign., Klp., the Kuršių Spit., Lzd., Pn., Švnč., Trak., Ukm., Vlkv., Zr.
44. *Libellula depressa* Linné, 1758 /1, 2, 5, 7, 8, 10, 12, 13, 14, 17/, Vilkaviškis, Vilnius, Al., Brž., Ign., Kn., Kp., Klp., Krtn., the Kuršių Spit., Mlt., Mrj., Pln., Pn., Šr., V., Vlkv., Zr.
45. *Libellula quadrimaculata* Linné, 1758 /1, 2, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 17/, Biržai, Vilnius, Al., Akm., Brž., Ign., Klm., Klp., Kr., the Kuršių Spit., Mlt., Mrj., Pln., Pn., Šl., Šr., Švnč., Trak., Vlkv., Vrn.; ab. olivacea T. /2/, Vilnius, V.; ab. praenubila Newm. /2/, Br., V., Vlkv.
46. *Libellula fulva* Müller, 1764 /2, 5, 6, 11, 13, 14, 17/, Vilnius, Ign., the Kuršių Spit., Mlt., Pln., Švnč., Zr.; ab. bimaculata Steph. /2, 5/, Vilnius, V.
47. *Sympetrum flaveolum* (Linné, 1758) /1, 2, 5, 8, 10, 12, 13, 14, 15, 17/, Biržai, Palanga, Vilnius, Al., An., Ign., Jrb., Klm., Klp., Kp., Ks., the Kuršių Spit., Lzd., Mrj., Pln., Rd., Šl., Šlu., Švnč., Trg., Ukm., Vlkv., Vrn., Zr.; ab. hyalinata Röd. /5/, V.
48. *Sympetrum depressiusculum* (Selys 1841) /13, 14/, Vilnius, Zr.
49. *Sympetrum danae* (Sulzer, 1776) /2, 5, 8, 10, 12, 13, 14, 15, 17/, Biržai, Vilkaviškis, Vilnius, Al., An., Jrb., Klm., Klp., Kp..

- Ks., Plr., Pn., Rd., Šl., Švnč., Trak., Trg., Ukm., V., Vlkv.
50. *Sympetrum vulgatum* (Linné, 1758) /2, 5, 7, 8, 10, 12, 13, 14, 15, 17/, Biržai, Vilnius, Al., An., Brž., Jrb., Klm., Klp., Kn., the Kuršių Spit., Pln., Pn., Rd., Šl., Ukm., Trg., Vlkv., Zr.
51. *Sympetrum striolatum* (Charpentier 1840) /6, 13, 14, 15, 17/, Vilnius, Al., Ukm.
52. *Sympetrum pedemontanum* (Allioni, 1766) /2, 5, 13, 14/, Vilnius, Rk., V., Vrn.
53. *Sympetrum sanguineum* (Müller, 1764) /3, 8, 10, 13, 14, 15, 17/, Anykščiai, Biržai, Vilnius, Al., An., Ign., the Kuršių Spit., Mrj., Rd., Švnč., Ukm.
54. *Sympetrum eroticum* (Selys, 1863) /18/, Zr.
55. *Leucorrhinia caudalis* (Charpentier, 1840) /6, 12, 13, 14, 15, 17/, Biržai, Al., Brž., Ign., Mlt., Šr.
56. *Leucorrhinia albifrons* (Burmeister, 1839) /2, 4, 5, 6, 7, 8, 10, 12, 13, 14, 15, 17/, Biržai, Vilnius, Al., Klm., Mlt., Mrj., Pn., Rd.; ab. fuscombrata Grig. /2, 4/, Vilnius; ab. aurata Früffer. /3, 4/ Vilnius.
57. *Leucorrhinia pectoralis* (Charpentier, 1825) /2, 4, 5, 6, 12, 13, 14, 15, 17/, Biržai, Vilkaviškis, Vilnius, Al., Ign., the Kuršių Spit., Lzd., Šl., Šr., Vlkv.; ab. a Dz. /4/, Vilnius; ab. b Dz. /4/ Vilnius.
58. *Leucorrhinia dubia* (Vander Linden, 1825) /2, 4, 5, 6, 10, 12, 13, 14/, Vilnius, Brž., Švnč., Tl., Vlkv., Zr.; ab. nigra Früffer /2, 4/, Vilnius.
59. *Leucorrhinia rubricunda* (Linné, 1758) /2, 4, 5, 6, 7, 10, 11, 13, 14, 17/, Anykščiai, Biržai, Vilnius, Al., An., Akm., Brž., Ign., Klp., Kn., Mlt., Pln., Šl., Švnč., Tl., Trak., Zr.; ab. aurea Früffer /2, 4/, Vilnius; ab. rubrodorsalis Dz. /2, 4/, Vil-

nius; ab. *grandis* Prüffer //, Vilnius.

Lietuvos Žirgelių (Odonata) sąrašas

Stanionytė A.

Razume

Pateikiamas sisteminis Lietuvos Žirgelių sąrašas, sudarytas iš autorius 1958-1992 m surinktos medžiagos, o taip pat iš žinomų literatūros šaltinių. Medžiaga surinkta 33 Lietuvos administraciniuose rajonuose.

Šiuo metu dabartinės Lietuvos respublikos teritorijoje užregistruota 59 Žirgelių rūšys ir 17 aberacijų, priklausančių 5 šeimų 24 gentims.

Nurodoma literatūros šaltiniai, kuriuose minima kiekviena sąraše išvardinta rūšis, bei radimo vietas.

Список стрекоз (Odonata) Литвы

Станёните А.

Резюме

Представлен список стрекоз Литвы, составленный из материала, собранного автором в 1958-1992 гг., а также известных автору литературных источников, включавший 59 видов и 17 вариатетов из 24 родов, принадлежащих 5 семействам. Материал собран в 33 административных районах Литвы. Для каждого вида указаны литературные источники, на основании которых данный вид отнесен к фауне Литвы, а также место нахождения материала.

New and rare for Lithuania insect species. Records and descriptions of 1993

INSECTS LISTED IN THE RED DATA BOOK OF LITHUANIA

Jakimavičius A.

Red Data Book of Lithuania was established 17 years ago - in 1976. At that time naturalists and biologists joined their efforts and compiled the lists of protected animals, plant species in Lithuania, thus preventing rare and vanishing species from the extinction. Red Data Book of Lithuania was published in 1981 /1/. This publication included one species of Coleoptera, 3 species of Lepidoptera and the whole genus of Bombus.

As naturalists and biologists accumulated new data on rare and vanishing species, the first Red Book was greatly updated and under supervision of the Environmental Protection Department of Lithuania there was compiled and published the new Red Data Book of Lithuania /2/. This publication included the species that naturally grow and reproduce in Lithuania. In total, 501 rare or vanishing animals, plants and fungi species are described in the current edition.

The insects make up the fifth part of the whole species of Red Data Book. They represent 8 orders: Ephemeroptera-3, species, Plecoptera-1, Odonata-6, Dermaptera-1, Coleoptera-17, Trichoptera-3, Lepidoptera-47, Hymenoptera-24. For all the species there is indicated the abundance "status" i.e. all the species are divided into

6 categories according to their need for protection and the ways of conservation. 0 - F extinct or probably extinct species (in the book 2 such species are given), 1 - Endangered species. Their abundance is on the verge of extinction (29), 2 - Vulnerable species (29), 3 - Rare species (31), 4 - Indeterminate, insufficiently studied species (10), 5 - Restored species, their numbers have been restored (1).

The insects are described in one chapter of the Book. At the beginning of the section, the species are listed systematically and by categories. The species are described according to a uniform scheme-indicating the category, knowledge about listing into the Red Data Books of other countries as well as the distribution, biotopes, biology, abundance and protective measures are provided. There are also presented the distribution maps for species in Lithuania, colored plates of insects. Colored slides (photo) of 6 insect species are given.

The summary of the data on species-distribution and population status in Lithuania is provided in English.

The insect species are described by 8 entomologists of Lithuania.

Vabzdžiai, išrašyti į Lietuvos Raudonąją knygą.

Jakimavičius A.

Rezume

Firmejoji Raudonoji knyga Lietuvoje išleista 1976 m. /1/. Joje buvo išrašyta 1 vabalų, 3 drugų rūšys ir visa *Bombus* gentis. Sukaupus naujų duomenų apie retes ir nykstančias rūšis ji buvo patikslinta ir smarkiai išplėsta /2/. Vabzdžiai naujojoje Knijoje sudaro penktadalių visų iš jų išrašytų rūšių. Jie priklauso 8 būriams: Ephemeroptera - 3 rūšys, Plecoptera - 1, Odonata - 6, Dermaptera - 1, Coleoptera - 17, Trichoptera - 3, Lepidoptera - 47, Hymenoptera - 24. Remiantis pasaulio priimtu tarptautiniu skirstymu, pagal apsaugos reikalinių rūšys suskirstytos į 6 kategorijas. Raudonosios Knigos rūšis aprašė 8 Lietuvos entomologai.

Насекомые, включенные в Красную книгу Литвы.

Якимавичюс А.

Резюме

Первая Красная Книга Литвы была издана в 1976 г. /1/, в которую были включены 1 вид жуков, 3 вида чешуекрылых и весь род *Bombus*. С накоплением новых данных о редких и исчезающих видах, она была уточнена и дополнена /2/. Насекомые в новой Книге составляют пятую часть общего списка видов. Они принадлежат 8 отрядам: Ephemeroptera - 3 вида, Plecoptera - 1, Odonata - 6, Dermaptera - 1, Coleoptera - 17, Trichoptera - 3, Lepidoptera - 47, Hymenoptera - 24. На основе принятого международного деления и по статусу охраны, они распределены на 6 категорий. Виды были описаны 8 энтомологами Литвы.
