

ERRATUM

In the paper “Notes on the *Acer*-feeding *Caloptilia* species (Lepidoptera: Gracillariidae) in Lithuania” (De Prins 2010: 101–108) an important record on *C. semifascia* (Haworth, 1828) mentioned as a rare species found in Curonian Spit (Ivinskis 2004: 51) skipped the attention of both the author and the referees. The author takes full responsibility for this omission and brings her sincere excuses to the readers of *New and Rare for Lithuania Insect Species*. I thank very much Ole Karsholt who pointed at this published record. At the same time I express my happiness that the prediction of the possible occurrence of the sibling species *C. semifascia* (Haworth, 1828) / *C. jurateae* Bengtsson 2010 in Lithuania is partly confirmed. I am looking forward to further reports on this interesting group of micromoths in Lithuania.
